### General Restrictions:

- Give livestock plenty of time to make their own arrangements.
- Let them know you are there - rather than surprise them!
- Do not scrape for lift, come away from the hill.
- It is the noise and size of the wing above them that frighten livestock most!
  
- If in doubt, err on the side of caution and give the farmers a wave.
- Better, stop and chat if you see them out (which you probably will!).
- Under any circumstance dogs are allowed!
